

Secure, real time communications
between funds and distributors
Is Now A REALITY

Delta Data's FundBlast™ Makes Counterparty Communications Easy

Is your current process for creating and communicating mutual fund change communications **time-consuming and difficult to audit**? Do you find it challenging to maintain distribution lists and partner contacts – **keeping them updated and correct**?

FundBlast™ is part of the Delta Data Oversight Solutions stack

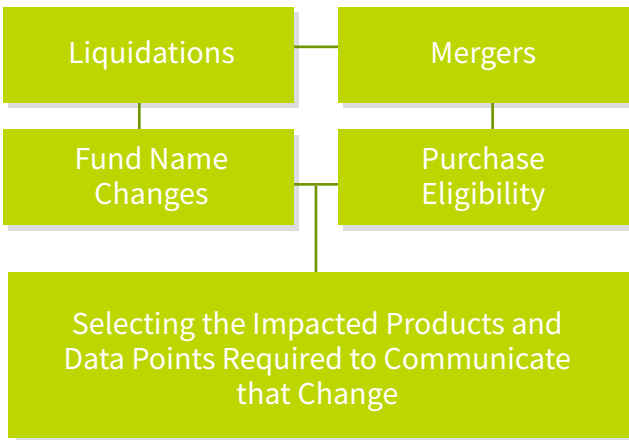

OUR SOLUTION

FundBlast is our unique communication portal that allows asset management firms to either create a new or replicate an existing fund change communication business process from start to finish. With FundBlast you can develop customizable approval workflows – for internal review and sign off on the communication before it is published.

Our cutting-edge software allows you to replace your existing “Blast Fax” or Dealer product change communication emails, all the while enhancing clarity, and reducing risk and time spent on corporate action communications. Provide your operations, employees, and company with an auditable, targeted, and efficient conduit for important communications that will streamline your processes and support your corporate actions with FundBlast.

HOW IT WORKS

FundBlast eliminates ambiguity and the time spent on answering follow-up clarifying emails from your distribution partners. It walks you step-by-step through the process to define the details of each event such as:

Upon publish date, Delta Data distribution clients will receive a real-time data set representing the event. FundBlast will email an event specific PDF to your other distribution partners.

In addition, FundBlast has tools that allow for ongoing management of your distribution lists and even allows for self-service maintenance by the distribution partners. FundBlast’s support of custom templates ensures application of your corporate branding and logo in a seamless automated process.
